THUNDERHACKS 2026 · BYTES OF THE ROUND TABLE

OLG Solution: Anti-Money Laundering

Finding laundering patterns in sports betting, and explaining every flag.

THE PROBLEM

Fixed rules raise many alerts but never say why, or whether it matters.

SYNTHETIC DATA

ALL PLAYERS AND TRANSACTIONS ARE GENERATED

HOW IT WORKS · **SYNTHETIC DATA**

One score, with the evidence behind every flag

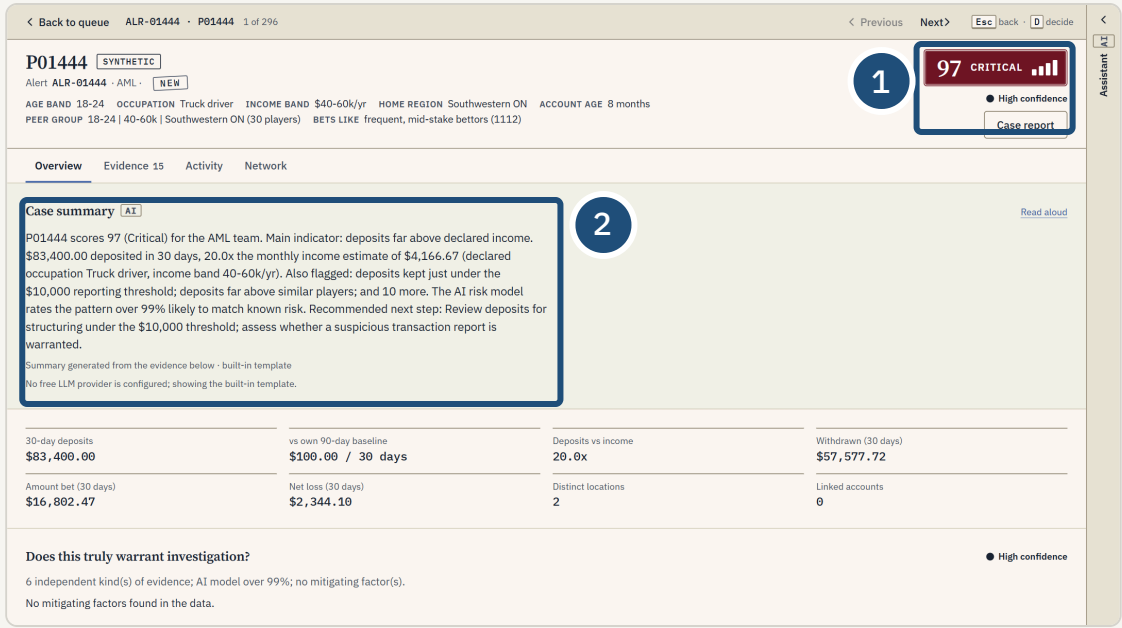

1 **Activity**
Bets, deposits, devices, locations

2 **Context**
Own 90-day history and peer groups

3 **Detect**
Rules, Isolation Forest, AI + SHAP

4 **Score**
Out of 100, every point a reason

5 **Ranked queue**
Investigator reviews and decides

1 Score and confidence

2 Summary from evidence only

RESULTS · SYNTHETIC DATA, SEED 42

Fewer false alarms, real cases on top

ALERTS RAISED

296

from 5,000 synthetic players

NORMAL PLAYERS WRONGLY ALERTED

Lower is better

REAL CASES IN TOP ALERTS

	OURS	RULES
Top 25	100%	92%
Top 50	100%	96%
Top 100	100%	98%

ROADMAP

Jube case management (mock today) · **CBN Crash Game** feed (draft contract)

RESPONSIBLE BY DESIGN

Synthetic data only · The investigator decides · Every flag explained
